

Insulated Sectional Door Panels

Kingspan Sectional Overhead Door Panels

Nothing outperforms Kingspan commercial overhead doors. These premium insulated steel doors are virtually unaffected by the everyday wear and tear of tough commercial environments.

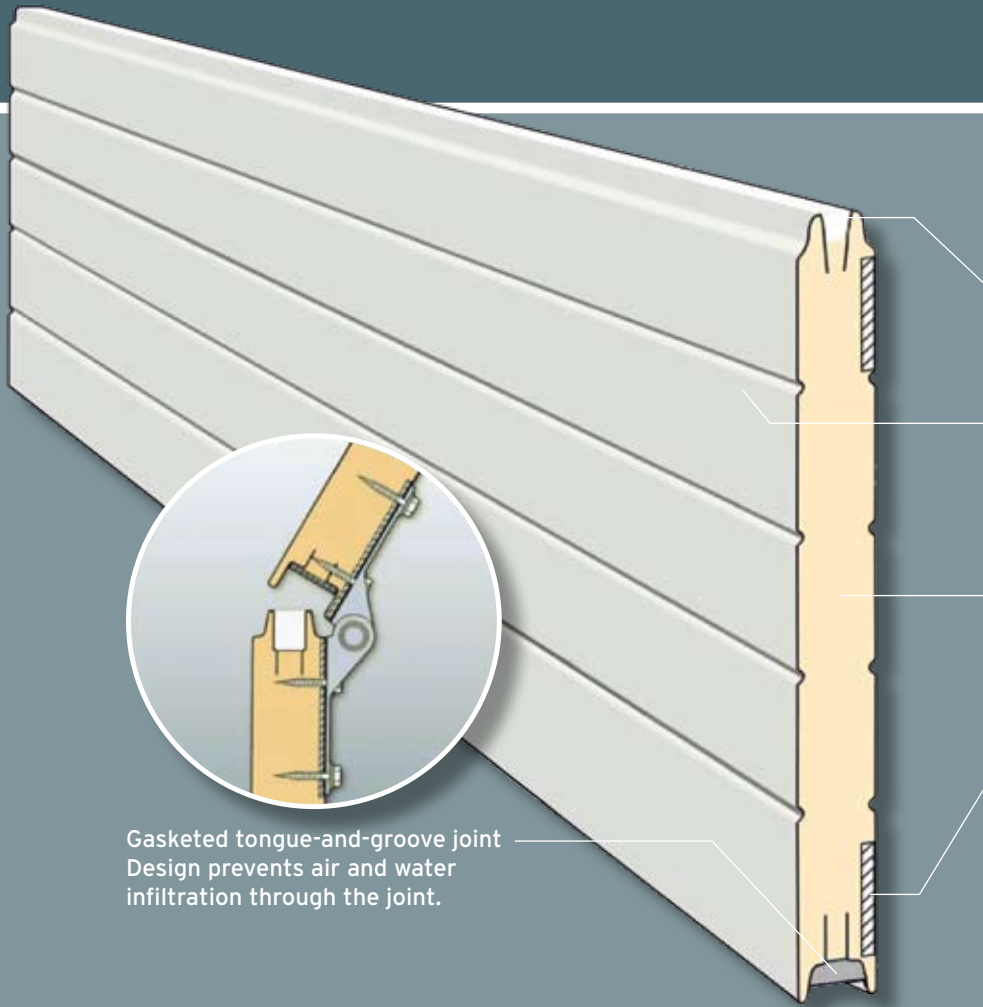

The Kingspan sectional overhead door panel is manufactured using advanced composite panel technology.

The results:

- Structural Integrity
- Lasting Durability
- Energy Efficiency
- Aesthetically Appealing

As a part of Kingspan Insulated Panels, the world's largest, most experienced insulated panel manufacturer, we stand ready to provide you with a quality door system that is unmatched in the industry.

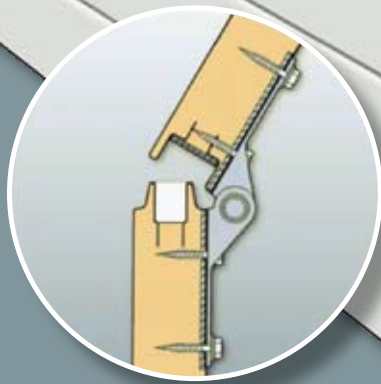

Kingspan Insulated Sectional Door panels

Built-in thermal break inhibits thermal transmission across the panel.

Metal is galvanized and features a one mil thick Valspar modified polyester paint finish to prevent rust and corrosion.

Polyiso foam over 95% of the foam cells are closed making it impermeable to water while also maintaining a high R-Value.

Built-in hinge plates are 3-3/4" wide and are continuous top and bottom. This permits usage of standard hinges, provides structural strength, and allows the panels to be cut to custom lengths, if desired.

Gasketed tongue-and-groove joint Design prevents air and water infiltration through the joint.

STANDARD FEATURES:

Thickness	1-3/4"
R-Value	14.96
Steel	Hot-dipped, galvanized interior and exterior steel skins
Color/Finish	Imperial white, stucco embossed and micro-grooved
Height	24" and 21"
Length	7'6" to 20'2"; plus 24'6", 28'6", 39'4"

OPTIONS:

Thickness	1-3/8" 2" 3"
R-Value	11.76 17.1 25.65
Color/Finish	Brown stucco embossed and micro-grooved
Steel	28 ga. to 20 ga.
Material	White aluminum, stucco embossed
Length	Any custom length up to 39'4", undrilled
End cap	18 ga. galvanized steel
